

Oceus Networks Adds COO to Executive Team

Randy Fuerst Joins Oceus Networks as Chief Operating Officer

RESTON, Va. — December 6, 2011 — Oceus Networks, a leading provider of broadband solutions to the Department of Defense, intelligence community, and federal government agencies, today announced the addition of Randy Fuerst as Chief Operating Officer. In this role, Fuerst will lead the execution of the company's strategic plan and provide the operational leadership that will enable the company to grow at an accelerated rate. In the COO role, Fuerst will oversee core operational elements, including delivery operations, engineering, product development, professional services, marketing and sales, and business development. Fuerst is based out of the company's corporate headquarters in Reston, Va.

"The addition of Randy as Chief Operating Officer will enhance the effectiveness and efficiency of Oceus Networks' operational performance," said Douglas C. Smith, President and CEO of Oceus Networks. "His expertise in the C4ISR domain and with network services broadens our management capability and is a valuable addition to our management team. We're excited to welcome Randy to the Oceus Networks family and know that his deep IT experience will assist us in furthering our mission to provide cutting-edge tactical broadband solutions to customers worldwide."

Fuerst brings to Oceus more than 30-years of industry experience in the delivery and management of technology systems and services across the federal government. He is an experienced senior corporate level executive who has held numerous executive positions over the course of his career. In his prior position as Chief Operating Officer for CACI International, Fuerst had direct responsibility for the successful growth of all of CACI's U.S. business groups. The business groups he managed provide systems integration, managed network services, intelligence solutions, and engineering and logistics to the Department of Defense, national intelligence community, federal civilian agencies, and state and local governments.

Oceus Networks, a wholly-owned U.S. business, was created on January 1, 2011 when Ericsson (NASDAQ: ERIC) completed the sale of Ericsson Federal Inc. to Tailwind Capital. Oceus Networks is a broadband solutions provider that designs, builds and operates communications networks by integrating best-of-breed products from the world's leading technology vendors. The company's strong partnerships, including an exclusive relationship for certain segments of the U.S. federal government with 2G, 3G and 4G mobile technologies leader Ericsson, enable Oceus Networks to quickly and cost-effectively help its customers utilize emerging communications capabilities to improve citizen services, deliver high-speed voice, video and data communications, distribute critical information and compete in the global marketplace.

About Oceus Networks

Oceus Networks provides broadband solutions to governments and industry that enable them to deliver high-speed voice, video and data communications. The company delivers open, standards-based mobile and fixed network infrastructure as well as an extensive portfolio of public sector-focused solutions to simplify and expedite the deployment of wired and wireless broadband communications solutions. Privately owned and operated, Oceus Networks' headquarters are located in Reston, Virginia, USA. Visit www.oceusnetworks.com to learn more.
